Production

Dr. Paul Lohmann®

High value mineral salts

## Sustainability

Dr. Paul Lohmann® is a responsible manufacturer of high value Mineral Salts in the 4<sup>th</sup> generation. Environmental protection, sustainability and good working conditions were already goals of the founder Dr. Paul Lohmann in 1886.

In 2020 Dr. Paul Lohmann® was awarded with the EcoVadis Silver medal. Especially in terms of environment, Dr. Paul Lohmann® scored particularly well. Sourcing of sustainable produced raw materials is particularly dear to the company.

## Jointly

The traditional and family-owned company Grecian Magnesite is specialized in mining and production of natural magnesite. The company is located in Chalkidiki, Northern Greece.

Large investment programs are continuously implemented by Grecian Magnesite, aiming at environmental protection, amongst others. Extensive restoration work is done in accordance with the most advanced international industry rules.

A long partnership associates the company with Dr. Paul Lohmann®. The companies share the same values and aspirations in terms of environmental protection and sustainability. They look to the future for the welfare of future generations.

High value mineral salts

## Responsibility

Grecian Magnesite is committed to environmentally-sound mining, focusing on maintaining the natural environment as close as possible to its pre-mining state. Land restoration and reforestation with olive trees are carried out to bring the mining area back into line with the original landscape.

## Purity

The Magnesium raw materials offered by Grecian Magnesite are directly coming from nature. At the production site of Dr. Paul Lohmann®, the natural Magnesium raw material is purified and acts as starting material in a strictly water based synthesis process for different Magnesium Salts. The products meet the highest purity requirements.
